REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose and/or teach a machine for making filter bags containing infusion product that comprises in combination: a unit (53) for preparing and feeding materials used to make the filter bags (1), a metering assembly (54), a forming unit (55), a dividing unit (56) and a cutting unit (57); wherein:

- in the unit (53) for preparing and feeding material, a web (17) of filter paper bearing a layer of heat-activated glue and a continuous thread (31) are moving continuously through the unit (53) while tags (6) and the thread (31) are associated with each other in rhythmical sequence at the ends of thread portions (7) that lie lengthwise relative to the filter paper web (17), have a predetermined length, and are delimited at their ends by first loops (10) made in the thread (31) itself;
- the metering assembly (54) places charges (19) of the infusion product on the filter paper web (17);
- in the forming unit (55), the web (17) of filter paper is folded onto itself in such a way as to form a tube (34) inside which the metering assembly (54) places charges (19) of the infusion product, the tube (34) then is gradually closed by sealing it along its longitudinal edges (18);
- in the dividing unit (56), pairs of sealed transversal joins (4, 5) are made in the tube (34) upstream and downstream of each tag (6), these transversal sealed joins (4, 5) dividing the tube (34) into a succession of substantially flattened containment chambers (2) containing corresponding charges (19) of the infusion product;

Art Unit: 3721

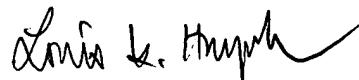

- and in the cutting unit (57), the tube (36) is cut into successive lengths, lying flat and lengthwise and each constituting the containment chamber (2) of a filter bag.
